IN THE ABSTRACT:

~~The invention relates to a~~ A method intended for controlling the display of at least one character on an output apparatus (DIS), **wherein** a summary description (DES) of ~~said~~ **the** character ~~being~~ **is** included in a database (DB)~~., said~~ **The** method ~~comprising~~ **includes** a step of extracting (RAS) from the summary description of ~~said~~ **the** character (DES) a nonexecutable symbolic code (SYM) defining actions for coloring in points on the output apparatus (DIS), a step of dynamic generation (DYN), from ~~said~~ **the** symbolic code (SYN)~~,~~ of an executable code (BIN)~~;.~~ ~~a~~ **An execution** step ~~of execution~~ (EXE) of the executable code ~~corresponding~~ **corresponds** to ~~said~~ **the** character so as to display the character on the output apparatus (DIS). ~~Advantageously, the method according to the invention comprises a~~ **A storage** step ~~of storing~~ in a storage module (STO) **includes storing** the executable generated code. ~~Application: Electronic apparatus requiring display as an auxiliary function.~~
